JULY 7-- AARC General Meeting, Spenard Rec Center 7 PM

JULY 7,8,9 Motley Group Picnic Byers Lake Campground

NEWS FROM THE DOG KENNEL - NL7DK

Well, I guess that this is my last chance to say anything I want. I am glad that my terms are finally over, but it has been a neat experience. I have certainly learned alot from all of you out there. I find that if you have any questions, all you have to do is ask and someone in the Club has the answer or knows someone who does. Also when you need help it doesn't take long and it shows up. The last big event of my office is Field Day, so y'all come and participate. After that I can sit back and loaf with just the Newsletter to worry about. Thanks again to everyone for all your help when it was needed. I forget a huge THANKS for all who are showing up at the Planning/Zoning and Assembly meetings. We've got them on the ropes we Hope. Thanks again!

73s NL7DK

NOTICE NOTICE NOTICE

The ALASKA QSL Bureau will be closed the months of June and July. KL7GNP

BELT BUCKLES And CLUB JACKETS

The Belt Buckles and Club Jackets have been ordered. I am told approximately 6 weeks for the jackets to be delivered. We do have to pay for them before we take delivery. Please pay NL7DK. \$32.50 with XXL \$5.00 extra. Thanks.

WANT TO BUY SOME HAM GEAR? HE SAYS HE'S NO LONGER INTERESTED IN AMATEUR RADIO AND WANTS TO LIQUIDATE HIS ASSETS.

AARC Board Meeting May 10, 1989

Meeting was opened at 7 PM. Those in attendance were: KL7HFM-Fred, NL7DL-Lil, KL7YF-Rick, AL7BB-Bill, KL7HD-Mark, KL7HM-Fred, KL7ITI-Bill, AL7BK-Lance, KL7DU-Ed, NL7HQ-Derek, NB4U-George, Pauline-Georges XYL, KL7IKX-Doug, and NL7DK-Harvey.

Treasurers report shows that we are still solvent. Gaming chairman tells us that our gaming efforts are having some problems, partly caused by the large expansion of Pull tab parlors. Our Bingo connection is bringing a lesser amount than we would like, but we'll take it. The gaming will now come under the Dept. of Commerce and Economic Development so there will probably be a re-write of operations for Pull tabs and Bingo which may give better control. Once again let Fred KL7HM know if you know of a place to put Pull tabs. APU Our Scholarship program with APU is doing fine, 2 \$300 scholarships per semester. VHF et al committee - KL7IKX-Doug says everything is plugging along. Our Intermod keeps acting up as things dry out. 90/30 still has problems, but access road not open. With AL7ID leaving the State his duties will be taken over by KL7HD-Mark. HB-247 would have eliminated the Free license plates for Hams. Rep. Fran Ulmer-Juneau amended it so we would not be affected. It is now in the Senate and will be taken up at the next Session. A letter of Thanks will be sent to Fran. Field Day was discussed. Questions have been asked about the AK DX Assoc. Prez will try to get info. Memorial station at McLaughlin in coming along. Final note KL7HD has Black Lab neutered, shots for giveaway. Meeting adjourned at 8:15 +-. NL7DK Acting whatever

AFTER ABOUT A YEAR OF READING THE RADIO COMPLAINT CARDS ON PORTABLE RADIOS, IT HAS BECOME EVIDENT THAT MANY OFFICERS ARE NOT AWARE AS TO WHAT RESULTS CAN ACTUALLY BE EXPECTED FROM A HAND HELD PORTABLE RADIO VS THEIR CAR RADIO. COMPLAINTS LIKE "WON'T RX BUT CAR RADIO WOULD"; STA 'A' SAID XMISSION BKING, HAD TO USE CAR RADIO, " ETC, ETC.

STANDARD POLICE MOBILE RADIO HAS AN ACTUAL POWER OUTPUT OF 30 WATTS. THIS 30 WATTS IS FED INTO A GAIN ANTENNA MOUNTED ON TOP OF A NEAR-PERFECT GROUND PLANE. THE RESULTANT EFFECTIVE RADIATED POWER IS 60 WATTS.

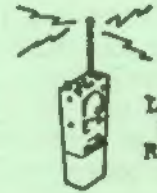

IN THE RECEIVE MODE, THE GAIN OF THE ANTENNA; GOOD GROUND PLANE; HEIGHT ABOVE GROUND & CLEAR OF OTHER OBJECTS THAT COULD DETUNE IT, IS ALSO VERY BENEFICIAL. IN ADDITION, THE OVERALL SENSITIVITY OF THE CAR RECEIVERS IS SUPERIOR TO A PORTABLE RADIO.

A PORTABLE RADIO HAS AN ACTUAL POWER OUT OF 2 WATTS. THIS 2 WATTS IS FED INTO AN ANTENNA THAT IS KNOWN IN THE TRADE AS A RUBBER DUCK.

THIS DIFFERENTIATES FROM A REAL RUBBER DUCK AS IT WILL NOT FLOAT IN A BATHTUB & WILL ALSO RADIATE POWER. RUBBER DUCK ANTENNAS HAVE NO GAIN. PORTABLE RADIOS HAVE A POOR GROUND PLANE, SO THE EFFECTIVE RADIATED POWER WILL BE LESS THAN 2 WATTS.

THIS WILL ALSO BE REFLECTED IN THE RECEIVE MODE. IN ADDITION, WHEN CARRIED NEXT TO THE BODY, AS IN A PORTA-CLIP, THE ANTENNA WILL HAVE SEVERE DETUNING & BE STILL LESS EFFICIENT. DO NOT DEPEND ON THE PORTABLE TO RECEIVE STATION 'A' AT ALL TIMES WHEN IT IS CARRIED IN THE PORTA-CLIP.

Your geographical location is very important.

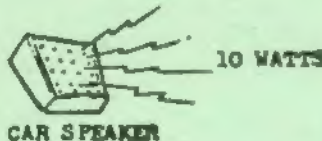

If you are inside concrete & steel bldgs or canyons, results will be much poorer than in the clear.

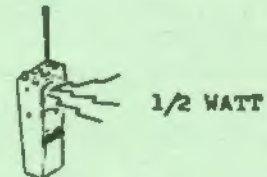

Speaking in normal voice into the speaker and holding the portable in the proper position & in the clear is also helpful.

THERE ARE STILL SOME AREAS IN THE CITY WHERE PORTABLE OPERATION MAY BE MARGINAL. BATTERIES MAY GET WEAK & CAUSE FURTHER DEGRADATION. YOUR AUTOMOBILE BATTERY THAT OPERATES YOUR CAR RADIO IS USUALLY AT FULL CHARGE. SO LETS SUM UP:

1. THE EFFECTIVE RADIATED POWER OF YOUR CAR RADIO IS 60 WATTS. THE PORTABLE IS 2 WATTS.
2. THE EFFECTIVE RECEIVE CAPABILITY OF YOUR CAR RADIO IS APPROXIMATELY 4 TIMES AS GOOD AS YOUR PORTABLE.
3. THE AUDIO AMPLIFICATION ABILITY OF YOUR CAR RADIO IS 10 WATTS AS COMPATED TO 1/2 WATT FOR YOUR PORTABLE.

CAR SPEAKER

IN ADDITION, THE CAR RADIO HAS A MUCH MORE EFFICIENT SPEAKER.

4. HOLD THE PORTABLE AS NEARLY VERTICAL AS POSSIBLE WHEN USING.
5. PORTABLE RADIOS ARE LIMITED IN THE ABUSE THEY CAN TAKE. THEY ARE ALSO VERY EXPENSIVE. THEY COST AS MUCH AS YOUR PATROL CAR RADIO, OR A HONDA 350 MOTORCYCLE. 10 TIMES AS MUCH AS YOUR SIDEARM. A LOT OF THE DOWNTIME IS FROM INTERMITTENT OPERATION USUALLY CAUSED DIRECTLY OR INDIRECTLY FROM SOME TYPE OF ABUSE. DON'T STICK THE ANTENNAS INTO THE CAGES ON GAGE CAPS. THIS PUTS MUCH STRAIN ON THE INSIDE ANTENNA STRIPLINE COMPONENTS & CAUSES HERNIAS ON THE RUBBER DUCK. TRY NOT TO SET THEM WHERE THEY CAN BE KNOCKED OFF OR OVER. IF YOU HAVE TO USE THE PORTABLE AS A SAP TO PREVENT INJURY, GO AHEAD, WITH OUR BLESSING. IT IS THE CARELESS ABUSE WE WOULD LIKE TO PREVENT.

IN SPITE OF ITS LIMITATIONS AS COMPARED TO YOUR PATROL CAR RADIO, YOUR PORTABLE RADIO IS A VERY EFFECTIVE & USEFUL TOOL & IF USED PROPERLY WILL GIVE AMAZING RESULTS.

7. AS HIGHER POWER PORTABLES BECOME AVAILABLE, THEY ARE SPECIFIED. WE NOW PURCHASE 5 WATT PORTABLE UNITS, HOWEVER, THE ABOVE LIMITATIONS STILL HOLD TRUE.
8. REPORT POOR PORTABLE RADIO TRANSMITTING AND/OR RECEIVING AREAS TO HELP PINPOINT SYSTEM IMPROVEMENT REQUIREMENTS.

Kilbuck students earn ham radio licenses

Kilbuck's new ham radio operators pause for a moment with their teacher and 30-year "ham" veteran Allan Wintersteen. Four of these students have passed all the exams necessary to receive their license, while the others continue to work towards that goal. From left to right: Jonathan Squire (front), Mark Patten (back), Donovan Teter, David Ausdahl, David Murray, Ryan Balliet, Dulcinea Hooper, Jason Peebles, Aren Sparck and librarian Allan Wintersteen. Not shown are students Heather Jung and Quentin Simeon.

(Photo by Cheryl Hinkes)

For the past two months, 11 Kilbuck students in grades four through six have been diligently working to become amateur ham radio operators.

Under the volunteer instruction of Kilbuck Librarian, Allan Wintersteen, students have had to learn International Morse Code (called "CW" by hams), radio theory, how international radio signals are sent, how transmitters and receivers work and procedures for communications.

The class started Jan. 30 and the students have been meeting before school on Mondays, Tuesdays, Wednesdays and Thursdays of each week from 7:30 to 8:30 a.m. in the school library.

"We are using a 10-year-old transceiver that I brought from home," Wintersteen said. "If anyone has a ham radio transceiver they could donate or sell, we would be interested."

Wintersteen said they would like Kilbuck school to

have it's own permanent equipment and station.

To date, four Kilbuck students have passed both the code and theory tests and are waiting for their licenses from the Federal Communications Commission (FCC). Two others have passed their code test but need to pass the theory portion.

The remaining five students are still studying in order to pass these tests, Wintersteen said.

Allan Wintersteen (call number KL7IEJ), has been a ham radio operator for 31 years. He said he got his novice license when he was in high school.

"After these kids receive their novice radio licenses, they will be able to literally talk all around the world," the librarian said. He added that the students will be able to use the radio equipment in their free time without supervision, once they receive their licenses.

"Novices can now talk using a microphone on the ten-meter band. This band is open to world-wide communications," says Wintersteen. "These kids will be able to talk to Paris, London, Moscow, Anchorage - all over the world!"

According to Wintersteen, being a ham radio operator is not only fun for students, but can help in their studies.

"Kilbuck kids who are hams can be resource persons for classes that are studying different areas of the world," he said.

The 11 Kilbuck students who have stuck with the class from the beginning are:

Ryan Balliet (6th), Jonathan Squire (6th), David Murray (6th), David Ausdahl (5th), Aren Sparck (6th), Jason Peebles (4th), Donovan Teter (6th), Dulcinea Hooper (5th), Heather Jung (6th), Mark Patten (5th) and Quentin Simeon (6th).

This energetic bunch of students said the course has been difficult but "worth it."

Sixth grader Jonathan Squire, said he found it most difficult to remember the different bands while fifth grader, Dulcinea Hooper thought the morse code was hard to learn.

"The hardest part was just sitting down and learning all of it," said Aren Sparck, a sixth grader.

The students seem anxious to get the formalities out of the way and become independent novice hams.

"I want to call Russia when I get my license," says sixth grader, Jonathan Squire.

The entire group seems to agree that they were fortunate to receive this training, and believe others will want to follow in their path.

"It's a great opportunity and learning experience for everybody," says fifth grader, David Murray.

NOTICE

The Club computer database has been modified to include space for member's license class and license expiration date. This information will be printed on the first line of your mailing label which is used to get your newsletter to you each month.

Please check your mailing label and verify the information on it. If it is incorrect, or if there is info missing, please notify me so that I can update the records.

The following is a sample of what the label should look like and an explanation of the first line:

1289 AD0895 A
JOHN G. HAM KL7ZZZ
1000 DUMMY LOAD DR
HIGH POWER. AK 99000

The first four characters in the first line are your AARC expiration date or, in the case of AARC Life members, your Life membership number. The second group of six characters indicates your FCC license class and the month and year your license expires. The last character indicates your ARRL Membership status. "A" indicates annual ARRL Membership and "L" indicates Life ARRL Membership.

This information is important to us because it will allow us to assign operators to positions where they are qualified in the event of an emergency. The ARRL membership information is needed in order for the club to be able to verify and maintain it's Affiliated Club status with the ARRL.

Please check your labels and help me fill in the blanks.

For those families with two or more club members that receive only one newsletter, the additional labels can be found at the bottom of this page.

Thanks for your assistance.
